MEGAN M. COFFER | COFFER.MEGAN@EPA.GOV

EDUCATION

North Carolina State University, Center for Geospatial Analytics, Raleigh, NC 2018 – present
Ph.D. Student, Center for Geospatial Analytics, Current GPA: 4.0
Advisor: Dr. Helena Mitasova and Dr. Blake Schaeffer

North Carolina State University, College of Sciences, Raleigh, NC 2015 – 2017
M.S. Marine, Earth and Atmospheric Science, May 2017, GPA: 3.9
Graduate Certificate, Geographic Information Systems (GIS), May 2017
Advisor: Dr. Erin Lee Hestir

Meredith College, Raleigh, NC 2011 – 2015
B.S. Mathematics, Minors in Statistics and Psychology, GPA: 3.4

RESEARCH EXPERIENCE

U.S Environmental Protection Agency (EPA), Office of Research and Development
ORISE Research Fellow with Dr. Blake Schaeffer 2017 – Present
I contribute to two main research projects. The first uses satellite remote sensing from MERIS and OLCI to assess the status of Cyanobacterial harmful algal blooms (cyanoHAB) for inland lakes across the United States. The second uses commercial remote imagery to identify the extent of seagrass beds in coastal waters and estimate their carbon storage.

North Carolina State University, Center for Geospatial Analytics
Research Assistant with Dr. Joshua Gray 2017
I contributed to a research project that aimed to use continuous change detection and classification (CCDC) with the Landsat series to both identify deforested regions across Indonesia and determine what land cover replaced these regions after deforestation had occurred.

North Carolina State University, Department of Marine Earth and Atmospheric Science
Graduate Research Assistant with Dr. Erin Lee Hestir 2015 – 2017
I analyzed the relationship between environmental variables and CO_2 flux from Arctic wetlands using a statistical model combining micrometeorological flux tower data and satellite observations.
Undergraduate Research Assistant with Dr. Sandra Yuter 2014 – 2015
I contributed to a project to create a more realistic and informative three-dimensional representation of thunderstorm structure to supplement existing schematics. This was achieved through the remote operation of two research radars located near Denver, CO during a one-month period.

TEACHING EXPERIENCE

North Carolina State University, Department of Marine Earth and Atmospheric Science
Teaching Assistant 2015 – 2017
Introduction to Weather and Climate Laboratory (MEA 135) with Dr. Brian Eder

RELEVANT SKILLS

Environmental data science, remote sensing image processing, geospatial analytics and visualization in both R and ArcGIS (proficient) as well as experience in Python, MATLAB, and ENVI
Scientific instrumentation and data processing including satellite data, weather radar, weather stations, micro-meteorological flux towers, field spectroscopy, and GPS
Excellent oral and written communication skills developed through presentation of scientific results, development of research proposals, and university guest lectures
Effective leadership and supervision in academic and non-academic settings

HONORS AND AWARDS

NC State University Graduate Fellowship	2018
NCAEP David Griffin Environmental Scholarship	2017
Graduate Climate Conference Travel Award	2016
Meredith College Research & Travel Grant Recipient	2014 – 2015
NCAA Woman of the Year, Nominee	2015
Alpha Kappa Alpha Educational Advancement Foundation Award, Recipient	2014
USA South Athletic Conference Champion & All-Academic Honoree	2014
The National Mathematical Contest in Modeling, Honorable Mention	2015
National Student Athlete Award, Honoree	2013 – 2015
